Orienteering at Holton Lee

Outings with a Challenge.

Find your way on the paths shown on the map from one control point to the next.

There is a choice of 3 trails which are shown on the map

1. **Local** trail of 1.1km. Gravel paths and grassy paths.
2. **Meadow** trail of 2.5km Grassy paths and boardwalk over the marsh with good views from the hill top
- 3 **Heathland** trail of 3.2 km. A mix of good paths/boardwalk and some with uneven or softer sections.

Have a look at the trails and make your choice. You can do just part of a trail, if that suits you or make up your own route.

The Start/Finish marker is on the notice board on your left as you enter the car park.

Remember to look ahead and plan how to get from one control point to the next. At each control point remember to check that the letter is what you expect. If it is not, then study the map to see where you might have gone wrong. As a last resort, go back to the previous control point and try again.

Here is a typical control point. This one is on a tree and has the letter L. A list of what all the letters are attached to, is given on page 2.

All Users.

You may come across cattle in one of the meadows or grazing the open heath. They are docile and will ignore you, but please shut all gates behind you or they will stray. Keep your dog on a lead at all times.

After rain, it can be muddy in places, so please wear appropriate footwear.

Tramper Users

These paths MAY be suitable from Tramper vehicles but that will depend on the recent weather and their state of repairs. For guidance whether a particular route is currently suitable, please contact Livability Holton Lee on 01202 625562

An able-bodied companion is recommended to operate the gates for you.
